All partners (Bulgaria, Italy, Greece, Portugal) in the ‘Otherness’, Erasmus + KA2 project, share the idea that every individual is unique, equally worthy and has the right to live according to his beliefs, customs, practices and established behavior rules. We live in a world in which globalization and migration have brought together people from different ethnic origins, religious backgrounds, beliefs, traditions and languages. But sharing a common space does not automatically result in opening yourself to Otherness, trying to understand differences, valuing diversity and building common grounds for dialogue.

### The target groups of the project

Project activities **result** in acquiring new knowledge and skills, and changing attitudes: **students** learn and respect human rights to a greater extent; **teachers** get the knowledge of basics in human rights, diversity and education for community well-being  
 In the long run, we expect the students who have participated in the project to grow up and become open-minded citizens, value diversity and build non-violent societies based on collaboration, assertiveness and integrity.
